

Appendix 30. Xpert MTB/RIF register

Lab number	Patient identification number	Date sample received	Date Xpert results	Patient's name	Sex M/F	Age	Address	Requesting facility	Type of specimen ¹	Indication for Xpert ²			1 st Xpert ³	2 nd Xpert ³	3 rd Xpert ³	Sample quality ⁴
										TB diagnosis	RR screening NC	RR screening PTC				

¹ Indicate: sputum, gastric aspirate, other.

² Check primary reason: TB diagnosis or rifampicin resistant TB screening in new case (NC) or rifampicin resistant TB screening in previously treated case (PTC).

³ Check one. For the second and third Xpert, this refers to tests performed in the diagnosis sequence. Record in comments the reason for repeating (inconclusive result, negative sample, etc.).

⁴ Indicate: muco-purulent/salivary/bloody.

Microscopy results		MTB result			RIF result			RIF resistance - reference method			Comments
Result ⁵	Date	Detected ⁶	Negative	Inconclusive ⁷	Detected	Not detected	Indeterminate	Method used	RIF resistance result	Date result received	

⁵ Indicate: not done, negative, scanty (and number of bacilli), 1+, 2+ or 3+.
⁶ Indicate: very low, low, medium, high.
⁷ Indicate: indeterminate, no result, error (code).
